

Call of Duty 5 World at War Patch 1.2 Call of Duty 5 World at War Patch 1.2

2009-02-09 19:12 von Kelli (0 Kommentare)

Patch 1.2 für Call of Duty V - World at War ist soebend erschienen.

Neben einer neuen Version der Karte Makin bei Tageslicht (mp_makin_day) werden diverse Fehler in der Authorisierung, dem Download von Custommaps und der Punktevergabe "Power Ranking Server" beseitigt.

Für eine höhere Fairness in MP-Spielen sorgt die Beseitigung von Mapfehlern, Power Ranking, Hitboxen beim zur Seite lehnen, Nicks in Freund / Feind Farben und die Stärke der "Rifle"-Waffen.

Linux Server ist für "*in kürze*" angekündigt, aber jetzt noch nicht verfügbar.

Komplette Liste:

- Free Multiplayer Map! The tide is out and the sun is high – this daytime version of Makin sheds new light on the battle!
- Fixed exploits that allowed for power ranking servers.
- Fixed router related server authentication errors.
- Fixed HTTP Redirect functionality for downloading mods
- Fixed sound device crashes stemming from Emulated Sound Devices
- Fixed exploit which allowed players to color their name tag.
- Hits now register properly while targeted player is leaning.
- Enabled /cg_drawfps in multiplayer games.
- Fixed command-line +connect functionality
- /cg_fov no longer resets to the default value in between matches.
- Dedicated servers automatically reconnect to the Master Server in case the Master Server resets.
- "Accept Game Invite" is bound to its default key, F10.
- Implemented fix for attempting to join password protected servers from the server browser.
- Fine tuned Bolt-Action Rifles for balance.
- Screenshots no longer overwrite each other.
- Fixed various multiplayer map related issues and exploits.
