

md5 Summen der CoD Dateien md5 Summen der CoD Dateien

2005-02-21 20:40 von Kelli (0 Kommentare)

Du bekommst eine Fehlermeldung wie Pak Sum / Name Mismatch oder pk3 difference from Server Version?

Dann ist vielleicht eine deiner Call of Duty .pk3 Dateien beschädigt.

Ein einfacher Weg das zu überprüfen führt zu der ominösen md5sum.

Lade dir ein md5Sum tool für Windows herunter, z.B. hier: <http://www.slavasoft.com/hashcalc/>

Damit kann man diese einmalige Prüfsumme für alle Dateien berechnen und mit dieser Liste vergleichen:

Version dieser Liste: Call of Duty 1.5 Call of Duty UO 1.51

Ich habe noch kein Programm gefunden, das dies unter Windows automatisch mittels "lese von Datei ein" macht, so wie es das unter Linux gibt. Wer da einen Link hat: immer her damit!
